As a student currently studying Full Stack Development at DICH Academy, I really want to use my vacation to gain practical experience and develop my technical skills. I possess foundational knowledge in areas such as front-end development (HTML, CSS, JavaScript, ReactJS), back-end development (Node.js, Express, Ruby, Nest.js, TypeScript), and database management (PostgreSQL, MongoDB). Furthermore, I have actively engaged in team projects and self-learning activities to strengthen my problem-solving abilities and adaptability in real-world development environments.
